

Aero Asahi's participation in the first aircraft roll off by Joby's

Aero Asahi Corporation participated in an event held by Joby Aviation to celebrate the completion of the first aircraft to roll off Joby's pilot production line eVTOL aircraft on its newly built production line in Marina, California.

Aero Asahi Corporation with Joby Aviation ("Joby") to develop an air taxi shuttle service for Toyota related passengers in Japan that will utilize Joby's revolutionary all-electric aircraft. The proposed service would offer an efficient and clean form of transportation to Toyota-related employees, executives and customers between the various facilities of Toyota activities.

AAC will continue to improve the eVTOL operating environment at its domestic bases and intends to begin operations once Joby acquires type certification of its aircraft in Japan.
